

The center, entitled Faraman Farmaeiyan Hospital, was opened in 1970 with an initial area of 9303 square meters by its owner, Mr. Farman Farmaeiyan, with substructure of 10752 square meters, and was assigned to the university.

The hospital with the same name and as a public hospital, especially in the internal surgery and orthopedic fields, began its therapeutic activities and was later officially renamed to the Medical and Educational Center and along with the treatment of patients, various students have been trained so far.

Gradually, the name of the center changed to the Medical and Educational Center for Children in 1996, due to the province's need for a specialized pediatric center and the presence of a sufficient number of pediatricians. Given the development of the therapeutic and educational space and the transfer of internal and neonatal wards of Asad Abadi Hospital to this center, the hospital continued its activity as a specialty center for children in 1996.

The hospital has been the only specialty pediatric center for 14 years in the northwest region of the country with the area of 10688 square meters and substructure of 12550 square meters.

**The medical specialty wards are as follows:**

General Surgery, ENT, ICU, Neonatal Intensive Care Unit, Neurology, Gastroenterology, Kidney, Urology, Infectious, Pediatric, Oncology (blood), Allergy, Endocrine Glands wards, and Cardiovascular Unit

The emergency department is hostelry open and specialty clinics and hemophilia and thalassemia and chemotherapy clinics are open in the morning and evening and subspecialty clinics are active during the week.

The medical and educational pediatric center at Tabriz with all specialized pediatric fields, as the only center in the northwest of the country, provides diagnostic, therapeutic, educational and research services using the latest information and equipment and educates specialist manpower.

The center tries to satisfy children and their fellows by creating a happy, dynamic, safe, and peace environment and promote the health of the children of the community with the help of motivated and capable professors and personnel.

The medical and educational pediatric center intends to provide its patients with the highest quality services and satisfy them by establishing accreditation standards and strengthening the quality improvement unit.

Promoting the safety of patients and personnel by establishing hospital standards of patient safety pro is one of the main priorities of the center.

The center tries to increase its efficiency and effectiveness in providing better services to the covered community by attracting supports from various institutions and strata, developing the wards and facilities, and attracting specialized personnel.

The center intends to serve as the pole hospital at the country level and neighboring countries.
